Richmond, Va. – Virginia Health Information (VHI) has published Health Maintenance Organization (HMO) Compare to help consumers find, compare and choose the HMO that best meets their needs. Consumers may use the tool to compare over 60 measures that are most important to them such as availability of care, member satisfaction, screenings for cancer and more. **Compare HMOs**, available at <http://www.vhi.org/healthinsurance/HMOCompare.asp>, is part of VHI's free Consumer Guide to Health Insurance Options, a comprehensive guide helping Virginia consumers and employers learn about health insurance options.

With over 1.3 million Virginians enrolled in HMO plans, utilizing VHI's HMO Compare is a productive way to become better informed in an ever-changing healthcare landscape. The tool gives consumers access to data that includes insurance rates, state averages and national averages. Also new this year, VHI is excited to announce a handful of new Behavioral Health measurements for consumers to utilize while comparing HMOs, from antidepressant medication management to follow-ups after hospitalization for mental illness. The new measurements will give consumers an opportunity to learn more about HMO options regarding their mental health in addition to their physical health. Below are some key findings from this year's report:
